Glass Engraving Cabinets

A purpose build glass engraving cabinet designed by glass engravers for glass engravers. Our cabinet's compact design requires little floor space and provides a clean working environment. All machines are degreased and powder coated for maximum life and durability.

Features

- Front loading easy access
- Integral dust extractor
- Sit down engraving Position
- Adjustable media flow system
- Good internal lighting
- Flat glass option available

**FREE
TRAINING!**

In House Mask Making Systems

Our in house mask making systems allow you to create your own blasting stencils in minutes.

We supply all of the equipment required to produce the masks including flat bed exposure units, washout booths and film driers.

We are exclusive UK distributors for the full range of APM photo resist films including:

- **RapidMask** – this film is not only self adhesive but it is the only film available that doesn't need washing out.
- **APM Plus** – an excellent all round self adhesive film.
- **APM Pro Red** – a very user friendly film that is suitable for fine detail.
- **APM Pro Super** – very pliable making it especially suitable for curved surfaces.
- **APM R3** – this film is repositionable, self adhesive and very easy to use.

Full information on all of the films is available on request.
